FX hedging tools often require you to post collateral—and that can hamper your businesses flexibility. Let us help you with EDC's Foreign Exchange Facility Guarantee (FXG).

BENEFITS TO AN FXG:

- Protect your profit margin by locking in exchange rates—without tying up your working capital.
- Take the guesswork out of FX budget forecasts.
- Increase your borrowing capacity.
- Improve cash flow management.
- Potential access to more sophisticated FX hedging tools.

FX hedging tools limit the negative impact of fluctuating currency on your business.

Forward contracts enable you to lock in an agreed-upon FX rate for a transaction (not necessarily the current exchange rate) for a specific date in the future.

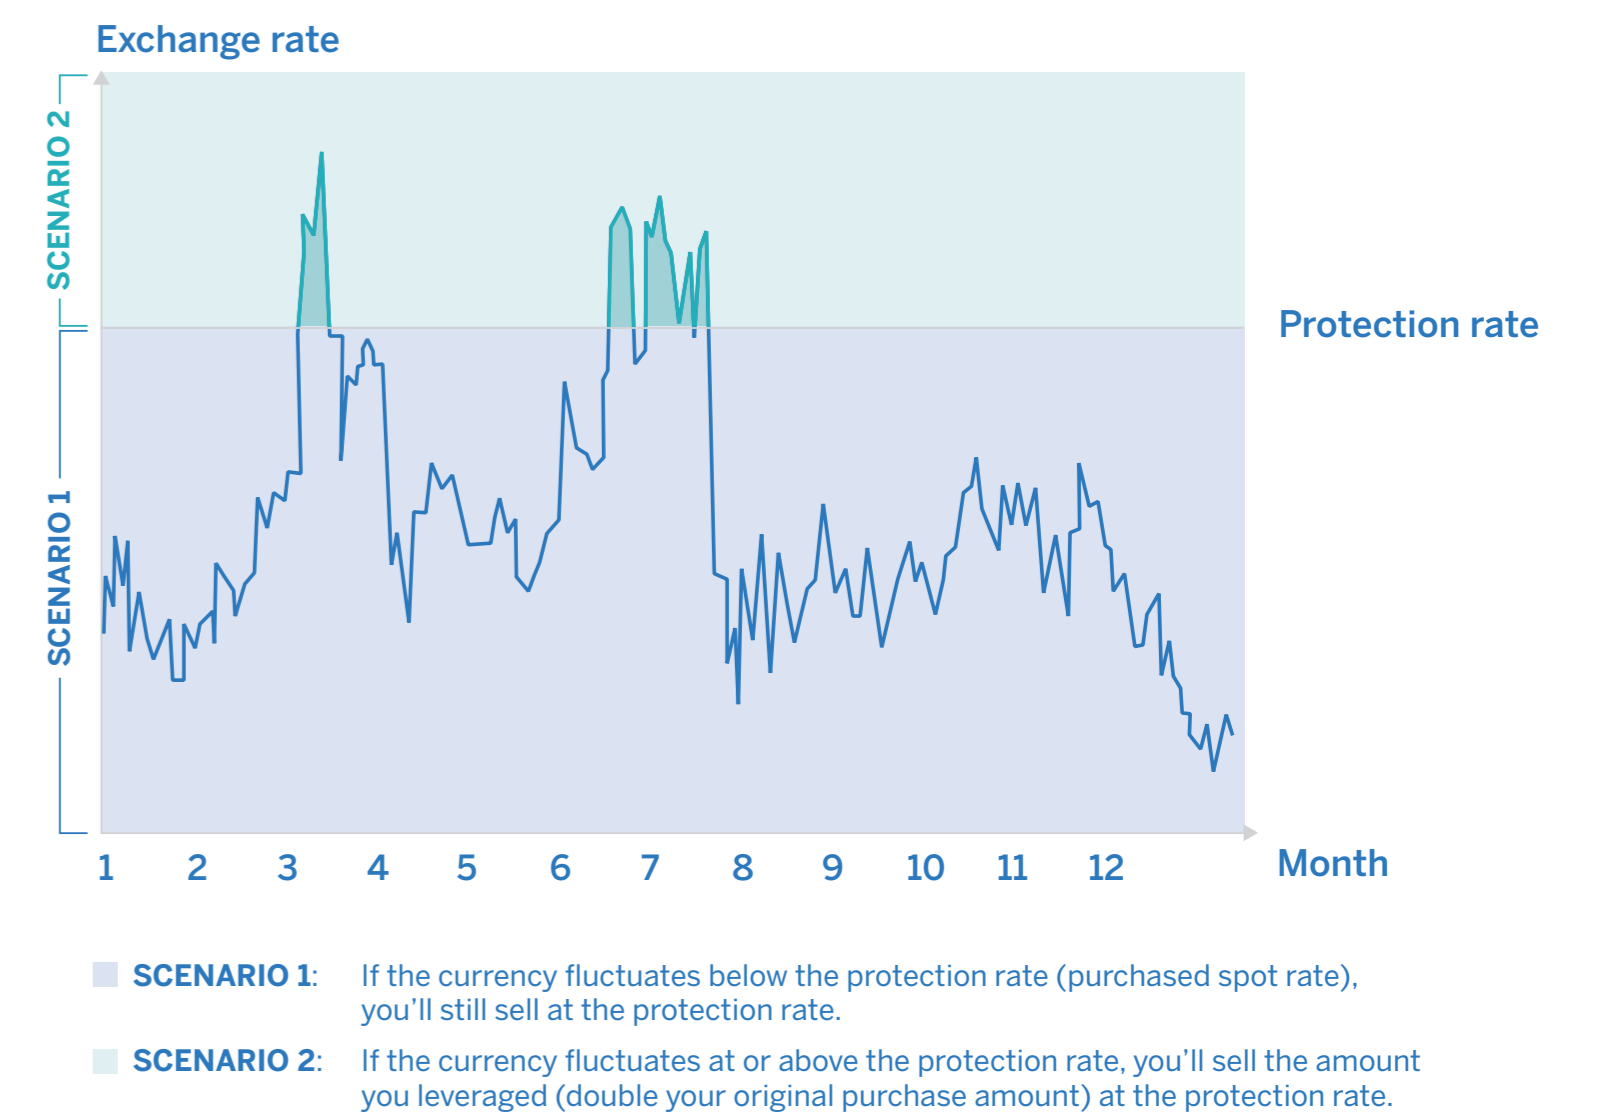

FORWARD CONTRACTS

Currency options* protect you against FX risk while still allowing you to profit from favourable movements in exchange rate.

* There are multiple variations of currency options. Speak with your FX provider to find the right options for you.

CURRENCY OPTIONS

A spot rate locks in the value of a currency at a particular moment in time and is paid for immediately.

When the exchange rate fluctuates before you get paid, you'll know exactly how much money you'll be getting from a sale.
